

# HIGHLIGHTS

Urban Sprawl >> Urban Ruins

## Common Concerns of Residents

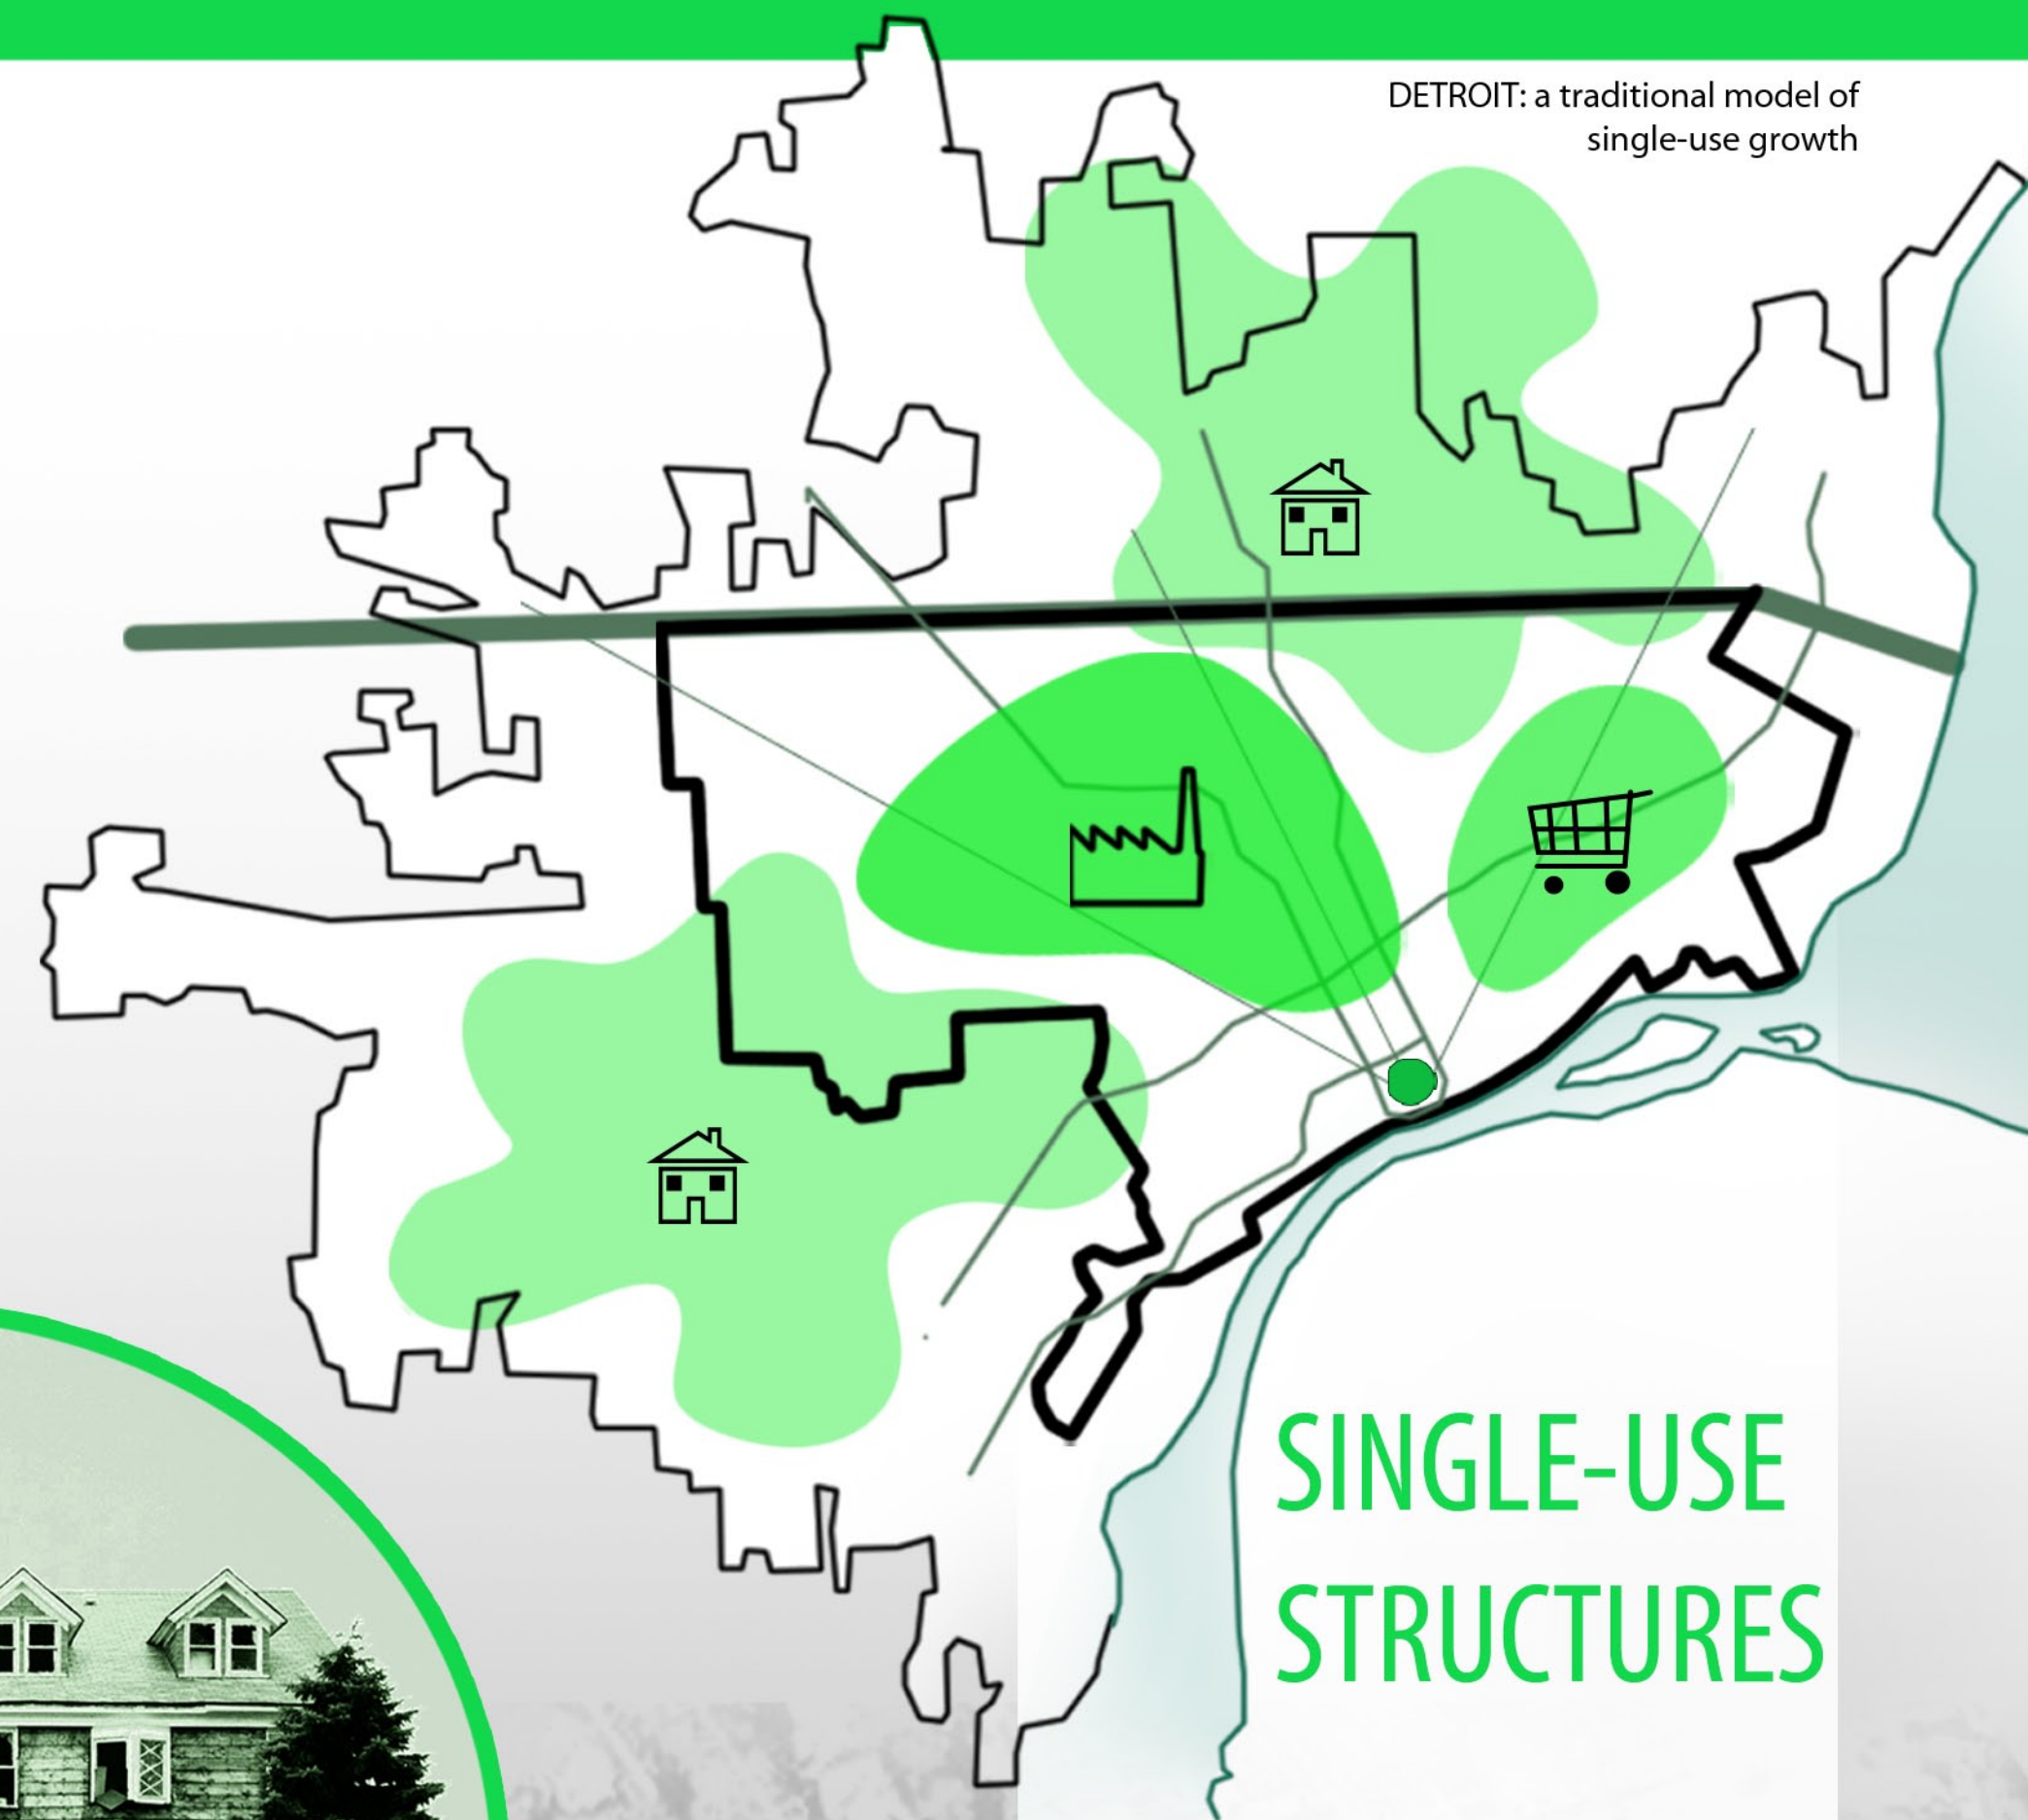

US Census Bureau/ SEMCOG/ Transportation Riders United

We need job opportunities for people who actually live in the city of Detroit.

One of Detroit's greatest assets is its architecture. We need to maintain this architecture. There is no Fisher building in the suburbs.

Urban farming is a fad. It cannot support a city economy.

We need to maintain the recently vacated schools. Neighborhood groups can take over the buildings and turn them into assets.

## SINGLE-USE STRUCTURES

The urban form of residential single-use  
St. Cyril Catholic Church Neighborhood, Detroit

## LANDSCAPE

- Use of land
- Indiscriminate urban growth
- Single use-structure
- Urban desert

## BUILDINGS

- Decay and obsolescence of building stock
- Politics of divestment
- Energy inefficiencies

## SOCIAL/ ECONOMIC

- Marginalization and isolation
- Racial divide
- Insecurity
- Unemployment

# STRATEGY

# HOW

Urban developpement models :  
NEW CENTERS OF ACTIVITY

from urban ruins >> to smart growth

## TRANSPORTATION AND DIGITAL INFRASTRUCTURE

Smart Mobility

- Accessibility
- Modern digital information infrastructure
- Sustainable, innovative and safe transportation systems

## NATURAL RESOURCES

Smart Environment

- Attractive natural surroundings
- Reduce Pollution
- Enviromental protection
- Sustainable resource management

## QUALITY OF LIFE

Smart Living

- Cultural facilities
- Health conditions
- Individual safety
- Housing quality
- Education facilities
- Touristic attractiveness
- Social cohesion

## SOCIAL AND HUMAN CAPITAL

Smart People

- Level of qualification
- Affinity to life long learning
- Social and ethnic plurality
- Flexibility
- Creativity
- Cosmopolitanism/Open-mindedness
- Participation in public life

## COMPETITIVENESS

Smart Economy

- Innovative spirit
- Entrepreneurship
- Economic image and trademarks
- Productivity
- Flexibility of labour market
- Ability to evolve

## PARTICIPATION

Smart Governance

- Participation in decision-making
- Public and social service
- Transparent governance
- Political strategies & perspective

## Distributed Development

- Establish diverse and distributed centers of activity, organized as a hub and spoke system, that avoid the unbalanced and unsustainable growth caused by the center-periphery model of prior urban development models.
- Create infrastructure and environmental conditions to support the clustering of services.
- Leverage digital communications technology to reduce the need to move people and goods

## Diversification

- Distribute social services evenly throughout the network with a development approach that fosters a balance between supply and demand.
- Attune the plan and development strategy to the interconnection and interaction among spaces and activities to foster a way of life based on simultaneity rather than linearity, a commingling of spaces, functions and interests that will support diversity, innovation, adaptability and agility.

## Densification

- Favor dense development to reduce land use, provide open spaces, and restore the natural environment.
- Facilitate communication via proximity as well as digital networks to support collaboration, foster development of complex processes, and tap power of serendipity to trigger innovation.

## Deconstruction

- Deconstruct the boundaries between socializing, living and working to transform how the environment is perceived and used and to improve the quality of life.
- Preserve a sense of place, and allow each place to express its natural purpose and function in the community.

## PROTECTIVE ENVELOPES

IDENTITY  
ENVIRONMENTAL PROTECTION  
REDUCING DEMOLITION WASTE

## SOLAR GAIN DAYLIGHTING

## CONNECTIONS

## NEW MODELS FOR LIVING

INTEGRATED FACILITY SYSTEMS  
FLEXIBILITY  
MIXITE' /PLURALITY OF FUNCTIONS
